

CAPABILITY STATEMENT

ENGINEERING / CONSTRUCTION / RELIABILITY

FEDERAL FACILITIES • MISSION-CRITICAL INFRASTRUCTURE • MULTIDISCIPLINARY PROJECT DELIVERY

CYTRIC LLC is a Maryland-based engineering and contracting firm supporting federal, institutional, and mission-critical facilities. We integrate electrical, mechanical, HVAC, plumbing, automation, testing, commissioning, and reliability services—from technical assessment and planning through coordinated field execution and closeout.

CORE CAPABILITIES

Electrical & Critical Power Switchgear, distribution equipment, breaker testing and retrofits, generators, ATS/UPS, arc-flash and coordination studies.

Mechanical, HVAC & Plumbing Chilled-water systems, AHUs, pumps, valves, steam distribution, piping, fuel tanks, and day tanks.

Building Automation & Controls BAS/BMS, SCADA, PLC, control-system assessment, integration, and troubleshooting.

Testing & Commissioning Electrical maintenance testing, functional verification, TAB coordination, and performance documentation.

Reliability & Project Delivery Preventative maintenance, MOPs, outage planning, procurement, field coordination, and technical reporting.

SELECTED PROJECT EXPERIENCE

Electrical Infrastructure Power distribution maintenance and testing; breaker modernization; emergency power/generator systems; ATS/UPS; MCC assessments; circuit repairs.

Mechanical & Facility Systems Chilled-water modernization; AHU maintenance and TAB; steam-trap work; fuel-storage/day-tank upgrades; preventative maintenance.

Renewable Energy Solar photovoltaic equipment replacement and inverter testing and evaluation.

Automation & OT Systems SCADA/PLC functional testing; building automation upgrades; OT infrastructure testing and modernization.

ADDITIONAL LEADERSHIP EXPERIENCE

Prior engagements through other organizations: Federal facility OT/ICS cybersecurity assessments; critical infrastructure risk mitigation; Zero Trust architecture and enterprise infrastructure implementation; secure industrial network modernization.

WHY CYTRIC

- ✓ Mission-critical federal facilities experience
- ✓ Multidisciplinary electrical, mechanical & controls expertise
- ✓ Experienced technical staff and established vendor relationships
- ✓ Safety-focused execution and site coordination
- ✓ Responsive communication and accountable project management

PROJECT DELIVERY & DOCUMENTATION

ASSESS & PLAN

Site assessments, engineering reviews, scope definition, MOPs and outage planning.

EXECUTE & COORDINATE

Procurement, field operations, subcontractor coordination, safety and progress reporting.

TEST & DOCUMENT

Functional testing, commissioning, deficiency resolution, technical reports and closeout.
